Freedi Participant Personas

Persona 1: Maya, The Frustrated Community Member

- **Age**: 34, urban planner assistant
- **Pain**: Feels her voice is lost in town hall meetings. The loud voices always win.
- **What's in it for her**: Finally a way to contribute her ideas without being interrupted. She can think, write, and evaluate others' ideas at her own pace. Her good idea gets recognized by consensus, not by volume.
- **Key motivation**: **Equality of voice**
- **Behavior**: Writes detailed suggestions, carefully evaluates others, checks back to see how her ideas rank

Nano-banana prompt:

> *Portrait of a 34-year-old woman with brown curly hair, warm brown eyes, wearing a casual blazer over a t-shirt, holding a tablet, standing in front of a community bulletin board, determined but hopeful expression, soft natural lighting, illustration style, warm color palette*

Persona 2: Oren, The Overwhelmed Manager

- **Age**: 42, team lead at a tech company (15 people)
- **Pain**: Every team meeting turns into a debate dominated by 3 people. Decisions feel forced. Half the team disengages.
- **What's in it for him**: He can get EVERYONE's real opinion asynchronously. He sees what the team actually thinks, not just what the loudest say. Better decisions = better outcomes = he looks good.
- **Key motivation**: **Better team decisions with less friction**
- **Behavior**: Creates deliberations, reviews consensus results, uses data to make final calls

Nano-banana prompt:

> *Portrait of a 42-year-old man with short dark hair and light stubble, wearing a button-down shirt with rolled sleeves, sitting at a desk with multiple screens, one hand on chin thinking, tired but engaged eyes, modern office background, illustration style, blue and gray tones*

Persona 3: Noa, The Shy Student

- **Age**: 19, university student in political science
- **Pain**: Has strong opinions but freezes in class discussions. Her ideas are good on paper but she can't articulate them live.
- **What's in it for her**: She can express herself through writing. She sees others agree with her ideas. It builds her confidence. She discovers she's actually persuasive when given the right medium.
- **Key motivation**: **A safe space to express and be heard**
- **Behavior**: Writes thoughtful suggestions, reads everything, evaluates carefully, rarely initiates but deeply engages

Nano-banana prompt:

> *Portrait of a 19-year-old young woman with straight black hair and glasses, wearing a university hoodie, sitting cross-legged on a library floor with a laptop, concentrated expression with a slight smile, books and warm lighting in background, illustration style, soft pastel tones*

Persona 4: Rami, The Skeptical Citizen

- **Age**: 55, retired engineer
- **Pain**: Doesn't trust institutions. Has seen too many "consultations" that were just rubber stamps. Thinks nobody really listens.
- **What's in it for him**: Transparency. He can SEE the process. He can see all options, see how people voted, verify the outcome isn't rigged. The math is visible. If enough people agree with him - it shows.
- **Key motivation**: **Transparency and accountability**
- **Behavior**: Reads everything critically, evaluates strongly (both agree and disagree), watches results closely, vocal if process seems unfair

Nano-banana prompt:

> *Portrait of a 55-year-old man with gray hair and reading glasses pushed up on forehead, weathered face with sharp intelligent eyes, wearing a simple polo shirt, arms crossed, standing in a public square, skeptical but attentive expression, illustration style, earthy natural tones*

Persona 5: Lina, The Community Organizer

- **Age**: 28, works at an NGO focused on youth empowerment
- **Pain**: She organizes workshops but can never scale beyond 30 people. Post-its and whiteboards don't capture the nuance. Reporting results is manual and painful.
- **What's in it for her**: She can run deliberations with 300 people instead of 30. Results are automatic. She gets data she can show funders. Participants feel more engaged because it's on their phone.
- **Key motivation**: **Scale and impact**
- **Behavior**: Creates many deliberations, designs question structures carefully, shares links widely, presents results to stakeholders

Nano-banana prompt:

> *Portrait of a 28-year-old woman with short dyed red hair and an earring, wearing a colorful scarf and denim jacket, energetic smile, holding a phone in one hand and gesturing with the other, community garden or co-working space background, vibrant and dynamic, illustration style, warm energetic colors*

Persona 6: David, The Time-Strapped Parent

- **Age**: 38, works full-time, two kids, active in school parent committee
- **Pain**: Can't attend evening meetings. Misses decisions that affect his kids. Feels guilty and disconnected.
- **What's in it for him**: He can participate from his phone at 10pm after the kids sleep. 5 minutes to read options and vote. He's included without rearranging his life.
- **Key motivation**: **Asynchronous participation - involvement without time sacrifice**
- **Behavior**: Short bursts of engagement, reads quickly, evaluates, rarely writes long suggestions but votes on everything

Nano-banana prompt:

> *Portrait of a 38-year-old man with tired but kind eyes, slight beard, wearing a casual sweater, sitting on a couch at night with a phone, dim warm lamp light, toys visible in background, relaxed but focused expression, illustration style, warm nighttime tones with soft glow*

Summary: What's In It For Them

Persona	Core Need	Freedi Value Proposition
Maya (Community Member)	Equal voice	Ideas win by quality, not volume
Oren (Manager)	Real team input	Async consensus reveals true opinions
Noa (Shy Student)	Safe expression	Writing > speaking for introverts
Rami (Skeptic)	Transparency	Open process, visible results
Lina (Organizer)	Scale	30 to 300 participants, automatic results
David (Busy Parent)	Flexibility	5 min at 10pm = full participation

---

Cross-Cutting Themes (What ALL Personas Get)

1. **Agency** - "My voice actually counts"
2. **Fairness** - "The process is equal for everyone"
3. **Convenience** - "I participate on my terms"
4. **Clarity** - "I can see what everyone thinks and where consensus is"
5. **Impact** - "The results lead to real decisions"
